

Grade 7 Math Online Classroom Expectations

Google Classroom and On-line Textbook

These will be the tools I will use to distribute materials and assessments. You will see the following categories in your classroom. Be sure to be on Classwork not Stream.

Daily Attendance

You must check in every day to Google Classroom and open up the attendance form and mark yes. This must be done by 2:30 p.m. every day. If you do not mark present, you will be marked absent on skyward.

Calendar

The calendar is a recommended pace for you to complete your work in a timely manner, so you don't fall behind.

Google Meet

This time will be used for conferencing face-to-face. A link will be attached under this heading just prior to the conference. Once you join a meeting, make sure your microphone and camera are turned off. If I want you to turn them on, I will tell you. This time is for students to ask questions on their assignments. I will answer questions in an orderly manner. Once your question is answered, you may leave the meeting. You can rejoin at any time during the hour period, if needed. The Google Meet sessions run from 10:30-11:30 for periods 1-4 and 2:00-3:00 for periods 5-7.

Mr. Reissmann will also be running a Google Meet session for the Math Foundations students. This will run from 1:00 to 2:00. The link will be posted in your Math Foundations Classroom.

If your question does not need a face-to-face meeting, you can always contact me by email. I will check my emails multiple times a day.

Dates: Class work

The class work will be uploaded under the correct week. I will assign work on Monday for the whole week and expect all work to be completed by Sunday evening. If you do not complete the assignments within the week period, I will contact your parents, whether by email or phone call.

Assignments/Worksheets

You will be expected to watch the videos on Google Classroom and follow along and fill out your workbook. The workbook page at the end is your assignment, just like in class. Work out the problems (as noted on the calendar) and upload your answers using the on-line textbook. The assignment will show up under Assignments in the on-line textbook. Please watch the order of the on-line questions as they may not match up exactly with your workbook. Calculators may be used on all work. [ALEKS will continue while at home.](#) I would expect this done by Sunday evening also.

Assessments

Quizzes and exams will be on your on-line textbook. You may use your workbook and any self-made notes to take your assessments. You may also use a calculator to complete your assessments.

If you do not have internet access, please notify the school. We will find a way for you to access your work.

Don't worry, we've got this!
